Press Release – For immediate release

DIGITS LLC Releases Tool to Revolutionize Email Review.

Locally owned / Internationally Known

Buffalo, NY. — January 6, 2012. DIGITS LLC, an internationally recognized firm specializing in computer forensics and digital investigations, announced the release of a new tool, Evidence Analyzer: Email Edition, which is designed to radically streamline the process of examining large quantities of email data.

“So much of our work consists of managing the tremendous amounts of data we receive in the form of email, it only made sense that the first product we would release to the public would try to lessen this workload. Examiners, attorneys, and even corporate managers have never had an easy tool at their disposal to review this type of content without spending thousands or even tens of thousands of dollars. By taking our years of experience and combining our knowledge, I believe DIGITS has released a product that can be used by almost anyone, regardless of technical knowledge, training, or budget.” Said Michael McCartney, DIGITS LLC President and CEO.

"Evidence Analyzer: Email Edition has been on all of our minds for quite some time now. As an examiner and a software developer, I've seen the offerings on the market currently and was less than impressed. As a company, we set out to build something better that is simple enough and capable enough that even the most technically-challenged stakeholder can find their way around and be productive. This software is designed around the way a person works today. If you can use your email client, you will have no problem with this," says Bradley J. Bartram, DIGITS LLC CTO and Vice-President of Information Technology.

Evidence Analyzer: Email Edition is the culmination of over a year of research and development into how to best improve the arduous task of electronic messaging review. It is currently available for both Macintosh and Windows computers.

Evidence Analyzer: Email Edition can be obtained directly from DIGITS LLC at <http://www.digitllc.com/EAAE>

About DIGITS LLC – With offices in Buffalo and in West Seneca, NY, our core business is designed to help our clients take full advantage of today's information technologies while guarding against the ever-changing threats posed by those very technologies. DIGITS was founded in 2006 to fill the need in the legal and corporate communities for highly skilled computer forensic and data recovery services, corporate computer investigations, litigation support services, network security advisory services, and general computer consulting services. DIGITS LLC officers have over 115 years of combined law enforcement experience in Computer Forensics and advanced technology investigations.
